## Spruce solid wood inner lining

The characteristics of a solid wood lining are characterized by a naturally grown grain pattern as well as smaller visible knots and a distinctive structure, which is retained even after painting.

For solid wood enthusiasts, this product line is an optimal addition to your usual lifestyle and combines functionality and design at the highest quality level.

## Solid wood

Lining made of spruce 3-layer solid wood in the standard "paintable" version and also "clear lacquered" and "white pigmented" for an additional charge.

## 3-layer solid wood lining

Material thickness 19 mm, quality class A.

Dimensionally stable, little shrinkage and warpage.

## ALPINO Surfaces

Available in the surfaces spreadable, clear lacquered and in white pigmented.

Spreadable

Clear lacquered

White pigmented

## Schlegel roof window linings are available in various types.

### → Standard lining

The depth of the inner lining is the same all around, without any kinks at the top or bottom. Angles from 20 degrees (negative) to 160 degrees (positive) are possible.

### → Lining with double kink

With a kink at the top and bottom, possible at any depth. Also with a window sill, many variations are possible.

Type D and D-1 to D-8

### → Lining with wedge

For designs with a stretcher frame or if the all-round lining depth on the longitudinal part of the inner lining deviates by more than 1.5 cm.

Type K

### → Lining with wedge and kink

Designs like wedge inner lining additionally with a kink at the top or bottom or with a window sill. Many different variations are possible.

Type K-1 to K-10 and in wedge double side design  
Type KD and KD-1 to KD-8

### → Lining with kink

Versions with a kink at the top or at the bottom, also possible with a window sill.

Type A and A-1 to A-10

### → Combinations

Versions with kink, wedge and window sills are possible. Many different designs available.

Types: Cabrio, multiple linings and "3 IN 1" lighting solution

### → Twin inner lining

Each single lining type is also available as a twin lining in different versions. Many different designs available.

Type Twin, DUO or ROOM

## ALPINO solid wood lining

are made to fit exactly from spruce 3-layer solid wood.

Available in three surfaces:

- Spruce spreadable
- Spruce clear lacquered
- Spruce white pigmented

For the spruce spreadable version, you can do the surface treatment yourself.

The product is delivered pre-sanded and can be further treated as follows, for example:

- lacquer / paint
- glaze
- oiling
- staining
- wood waxes (only use suitable waxes)

### Carrier material

Spruce 3-layer solid wood, 19 mm thick, grade A. Dimensionally stable, little shrinkage and warping.

Cover frames available in 65, 80 and 100 mm width at no extra charge.
