Real wood surfaces

Selected high-quality real wood veneer chipboard, veneered on both sides. Grade A. Available in Pine wood/Beech wood/Maple wood/Oak /Golden Oak/ Ash wood white lacquered. Other types of wood are available on request. The lacquering is done with high-quality furniture lacquers.

Carrier material

Chipboard E1 certified, 19 mm thick
(Total thickness with coating 20 mm) - Grade A.
Absolutely dimensionally stable, no shrinkage or warping.

Thermal insulation

Better insulation value due to thicker material. Uniform and closed surface.

Fixing the inner lining and cover frame

Invisible, no staples, screws or nails necessary.

Cover frame

All frame corners are mitred together. Available in widths 65, 80 and 100 mm, without surcharge!

Oak

Golden Oak

Schlegel roof window linings are available in various types.

→ Standard lining

The depth of the inner lining is the same all around, without any kinks at the top or bottom. Angles from 20 degrees (negative) to 160 degrees (positive) are possible.

→ Lining with double kink

With a kink at the top and bottom, possible at any depth. Also with a window sill, many variations are possible.

Type D and D-1 to D-8

→ Lining with wedge

For designs with a stretcher frame or if the all-round lining depth on the longitudinal part of the inner lining deviates by more than 1.5 cm.

Type K

→ Lining with wedge and kink

Designs like wedge inner lining additionally with a kink at the top or bottom or with a window sill. Many different variations are possible. Type K-1 to K-10

and in wedge double side design

Type KD and KD-1 to KD-8

→ Lining with kink

Versions with a kink at the top or at the bottom, also possible with a window sill.

Type A and A-1 to A-10

→ Combinations

Versions with kink, wedge and window sills are possible. Many different designs available.

Types: Cabrio, multiple linings and "3 IN 1" lighting solution

→ Twin inner lining

Each single lining type is also available as a twin lining in different versions. Many different designs available.

Type Twin, DUO or ROOM

Real wood beech veneered

Beech wood

Only high-quality and selected beech veneers are used, which are characterised by a simple, slightly flowery grain and an even surface.

Beech matches white plastic or white lacquer roof windows and beech wood ceiling panelling.

The surfaces are finished with furniture-quality clear lacquer.

Cover frames available in 65, 80 and 100 mm width at no extra charge
